Memo to File:

RE: Sunshine Mining Company
Burgin Project

~~ACT/045/009~~ ACT/049/009
Tooele County, Utah

On July 29, 1983, Tom Portle and Susan Linner of the Division visited the Burgin Mine site. The purpose of the visit was to ascertain the success of revegetation test plots implemented in the spring of 1982. Twelve plots were set up in three different areas, using combinations of seeding, fertilizer, and mulch treatments; and lime in one area. A vegetation cover transect was done in each plot, and occurrence of all species in the plots noted. A report of the results will be written later.
